

Context-induced relational rewiring of the symbol space (Δ coupling matrix, Black Elk Speaks)

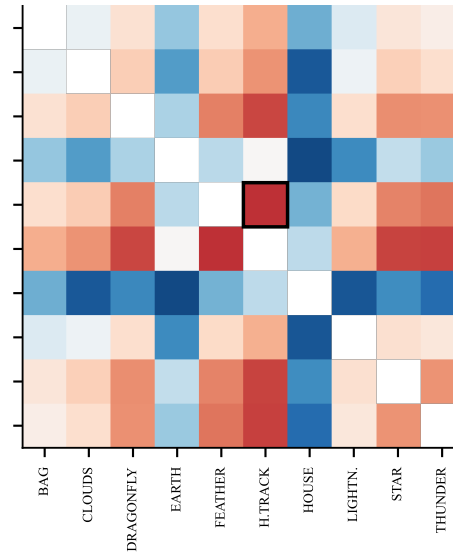

(A) Context-specific Δ -fingerprint similarity
identical text C3 $\equiv$ C_B $\rightarrow$ 1.00; opposing $\rightarrow$ negative

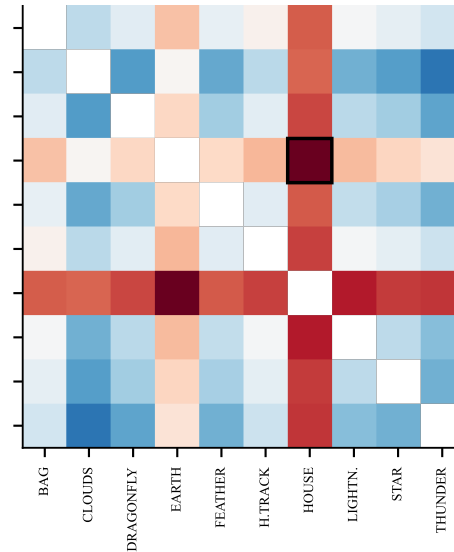

(B) C1 — the sacred hoop

(B) C2 — thunder voice & dawn horse

(B) C3 — the dream's end

shared-mode $\approx$ 101% of raw Δ
random-ctx floor $\approx$ 0.22
cross-symbol base rate 90%

symbol $\leftrightarrow$ symbol mean residual Δ coupling (red = context bridges the pair, blue = relatively decouples)
